SUMMARY

Software engineer in Kansas City, Missouri with a B.S. and M.S. in Computer Science (AI concentration). I founded Sozo Tech Enterprise and lead product, architecture, and a team of 3 — shipping The Sozo CRM to production and building AnglerIQ, an AI-powered mobile fish finder. Full-stack across React, Next.js, React Native, and PostgreSQL, with computer vision and agentic engineering in the day-to-day. Before Sozo I owned technology at Elevate Solar, including the public site and an internal facial-recognition tool.

EXPERIENCE (2)

Founder & Lead Software Engineer

Jan 2025 - Present

Sozo Tech Enterprise · Full-time

- Founded an investor-backed software company; own product, architecture, and engineering across web and mobile.
- Shipped The Sozo CRM from a blank repo to production at thesozocrm.com — dashboards, records, auth, APIs, and PostgreSQL on Next.js and TypeScript.
- Leading AnglerIQ, an AI-native fish finder: React Native architecture, computer vision, and location-aware features built for field use.
- Run a team of 3 developers — roadmap, sprint planning, code review, and releases — while taking on client web and mobile builds.

Head of Technology

Jan 2024 - Dec 2024

Elevate Solar · Full-time

- Owned technology for a solar company while finishing a B.S. in Computer Science — site, internal tools, and infrastructure.
- Designed, built, and launched elevate-solar.com as a conversion-focused marketing site for local solar sales.
- Built an internal facial-recognition application with computer vision for company operations.
- Set up and maintained the company's software tooling, hosting, and delivery pipeline.

PROJECTS (5)

FIG.01 · 2025 — PRESENT

AnglerIQ

AI-first mobile fish finder — on-device intelligence and location-aware features that help anglers read fish patterns in the field.

- Leading product direction and mobile architecture for an AI-native outdoor app on React Native and TypeScript.
- Computer vision and location features designed for real use on the water, not a demo environment.
- Coordinating a cross-functional team through design, build, and release.

React Native · TypeScript · Computer Vision · AI/ML · Mobile

FIG.02 · 2024 — PRESENT

Live ↗

The Sozo CRM

Sozo Tech Enterprise's first product — a full-stack CRM shipped from zero to a live SaaS at thesozocrm.com.

- Owned architecture, build, and launch: Next.js, TypeScript, PostgreSQL, auth, and deployment.
- Sales and client workflows — dashboards, records, and follow-up — rather than a generic admin shell.
- Became the foundation for Sozo's later products and client software.

Next.js · TypeScript · PostgreSQL · SaaS · CRM

FIG.03 · 2024 — 2025 Live ↗

Family Tracking & Management App

Full-stack family locator and safety platform — real-time location, tasks, rewards, and messaging.

- Role-based access so the right people see the right location and task data.
- Landing experience plus a mobile-responsive product UI built for everyday family use.
- React frontend with a Node.js and PostgreSQL backend.

React · TypeScript · Node.js · PostgreSQL

FIG.04 · CAMPUS APP Live ↗

ETAMU All-in-One

Cross-platform campus app for Texas A&M University–Commerce — student resources and workflows in one Flutter app.

- Single Flutter/Dart codebase shipping to iOS and Android.
- Centralized campus tools aimed at everyday student workflows.
- Capstone-scale delivery: 91+ commits, demo video, and notebook in the repo.

Flutter · Dart · iOS · Android

FIG.05 · 2024 Live ↗

elevate-solar.com

Marketing and lead-generation site for Elevate Solar, built as Head of Technology.

- Designed and launched the public site — clear story, fast load, mobile-ready.
- Sales-oriented structure and calls to action for local solar conversations.
- Delivered next to internal tools and a computer-vision facial-recognition app.

Next.js · TypeScript · Web

SKILLS

Languages: TypeScript, JavaScript, Python, Dart
Frontend & Mobile: React, Next.js, React Native, Flutter, Tailwind CSS, shadcn/ui
Backend & Database: Node.js, Express, PostgreSQL, MongoDB, Firebase, Supabase
AI & Agentic Engineering: Agentic Workflows, LLM Integration, Machine Learning, Computer Vision, Cursor, MCP
Tools & DevOps: Git, Docker, Vercel, GitHub Actions, Figma

EDUCATION

M.S. Computer Science — AI Concentration Aug 2025 - May 2026
Texas A&M University-Commerce

- Graduate coursework in artificial intelligence, machine learning, and intelligent systems.
- Applying AI concepts to capstone and product-oriented research alongside shipped products at Sozo.

B.S. Computer Science — AI Concentration Aug 2021 - May 2025
Texas A&M University-Commerce

- AI-focused undergraduate curriculum completed while competing as a Division I student-athlete (sprints and horizontal jumps).
- Southland Conference Spring Commissioner's Honor Roll as a Computer Science major.
