Chandler King

Forward Deployed Engineer · Full-Stack, Mobile & AI Software Engineer · Founder @ Studio Sozo

Kansas City, MO | chandler@studiosozo.dev | +1 (903) 424-4805 | chandlerking.dev | studiosozo.dev | github.com/kingct19 | linkedin.com/in/chandler-king-052861240

PROFESSIONAL SUMMARY

Forward Deployed Engineer and Software Founder in Kansas City, MO with a B.S. and M.S. in Computer Science (Artificial Intelligence concentration). Experienced working directly with clients to translate ambiguous operational problems into system architecture and shipping production software end-to-end across discovery, prototype, pilot, and deployment. Hands-on across TypeScript, JavaScript, Python, SQL, React, Next.js, React Native, Flutter, Node.js, PostgreSQL, REST APIs, webhooks, Docker, Linux, CI/CD, and LLM/AI agentic automation.

WORK EXPERIENCE

Founder & Lead Software Engineer · **Studio Sozo / Sozo Tech Enterprise** Jan 2026 - Present · Kansas City, MO

- Own consulting-style discovery and solution engineering with clients: map business systems, workflows, and operating constraints, then convert them into architecture blueprints, database schemas, and production software.
- Shipped The Sozo CRM (thesozocrm.com) from zero to production: role-based dashboards, analytics, authentication, REST APIs, PostgreSQL, MongoDB, TypeScript, Next.js, Docker, and CI/CD pipelines on GitHub Actions and Vercel.
- Lead mobile and AI product engineering on AnglerIQ (angleriqapp.com), an AI Co-Angler mobile app built with React Native, TypeScript, Claude AI, computer vision, and location intelligence for lake zone rankings and bite forecasts.
- Architected and delivered custom client platforms including Studio Sozo (studiosozo.dev), Home Ranger Services (homerangerservices.com), Splash & Dash Rentals (splashanddashrents.com), and Serene Dreams with Stripe, QuickBooks, and Twilio integrations.
- Manage a team of 3 developers across roadmap, sprint planning, code review, testing, and production releases while using LLMs and agentic workflows daily for rapid prototyping, debugging, and technical documentation.

Head of Technology · **Elevate Solar** Jan 2025 - Jan 2026 · United States

- Owned full-stack technical delivery and digital operations for a solar installation company while completing an M.S. in Computer Science: partnered with sales and field operators to replace manual bottlenecks with working software.
- Designed, built, and launched elevate-solar.com with Next.js and TypeScript — a fast, conversion-focused lead-generation platform integrated with analytics and automated inbound sales routing.
- Engineered an internal computer-vision facial recognition application and documented system architecture, process maps, and operational runbooks for non-technical staff.

PROJECTS

AnglerIQ — AI Co-Angler Mobile App (angleriqapp.com | React Native, TypeScript, Claude AI, Next.js, Computer Vision) 2026 - Present

- Built an AI-native fishing companion that maps lakes by species, computes real-time bite scores from weather and barometric pressure, runs Species IQ tournaments, and preserves private user catch coordinates.

Studio Sozo & Client Platforms (studiosozo.dev | Next.js, TypeScript, PostgreSQL, Stripe, QuickBooks, Twilio, AI) 2026 - Present

- Engineered custom 100% client-owned software platforms and booking/service engines including Home Ranger Services (DFW & Austin HVAC), Splash & Dash (Highland Lakes jet ski delivery), and Serene Dreams e-commerce.

The Sozo CRM (thesozocrm.com | Next.js, TypeScript, PostgreSQL, REST APIs, RBAC, CI/CD) 2025 - Present

- Designed and shipped a full-stack solar sales and pipeline management CRM from blank repository to production with multi-role workspaces, quote builders, and automated follow-up workflows.

EDUCATION

Master of Science (M.S.) in Computer Science — Artificial Intelligence Concentration · **Texas A&M University–Commerce** Jan 2024 - May 2026

- Graduate research and coursework in artificial intelligence, machine learning, intelligent systems, LLM orchestration, embeddings, and data exploration with Python and Jupyter.

Bachelor of Science (B.S.) in Computer Science — Artificial Intelligence Concentration · **Texas A&M University–Commerce** Aug 2019 - Dec 2023

- NCAA Division I Men's Track & Field Student-Athlete (Sprints & Jumps); Southland Conference Spring Commissioner's Academic Honor Roll; built the ETAMU All-in-One cross-platform Flutter campus app (91+ commits).

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES6+), Python, SQL, Dart, HTML5, CSS3
Frontend & Mobile:	React, Next.js (App Router), React Native, Flutter, Tailwind CSS, shadcn/ui, Framer Motion
Backend & Databases:	Node.js, Express, REST APIs, Webhooks, PostgreSQL, MongoDB, Supabase, Firebase, Prisma
AI, LLMs & Automation:	LLM Integration (OpenAI, Claude, Vercel AI SDK), AI Agents, Computer Vision, RAG, Embeddings, Jupyter, MCP
DevOps & Tooling:	Git, GitHub Actions, Docker, Linux, CI/CD, Vercel, npm, System Architecture, Technical Documentation
